PERSONAL STATEMENT

A proactive and people-driven Industrial & Production Engineering student at RUET with a demonstrated ability to lead initiatives, mobilize teams, and communicate effectively across diverse audiences. As an active member of different clubs of RUET, I have successfully coordinated large-scale career fairs, HR summits, and professional development events—connecting hundreds of students with industry professionals and fostering a culture of growth and opportunity. Backed by certifications from IBM, Harvard, Rutgers, and Google, and hands-on experience translating complex data into clear, compelling narratives, I bring a rare blend of analytical thinking and interpersonal influence. Passionate about creating meaningful impact through collaboration, strategic communication, and community engagement. I am eager to represent and amplify the values of forward-thinking organizations on a broader platform.

EDUCATION

BSc Industrial & Production Engineering (IPE), Rajshahi University of Engineering & Technology

CGPA: 3.74 / 4.00 (6th semester)

Expected Graduation: April, 2027

EXPERIENCE / LEADERSHIP ROLES

RUET Career Forum- Executive member (operations)

Co-ordinated career fair operations, industry relations, and professional development initiatives, connecting students with recruiters through campus recruitment, HR summits, workshops, and career-focused events.

RUET IPE club- Executive member

Supported different club activities, including the organization of seminars, skill-development programs, cultural programs, and student engagement activities aimed at strengthening technical knowledge and career preparedness.

British American Tobacco- Industrial Attachment

Led a filter waste analysis initiative, uncovering data-tracking gaps and process inefficiencies through root-cause analysis, and proposed system-level improvements to enhance waste visibility, traceability, and operational efficiency.

SKILLS

Technical Skills: Excel, Microsoft Power BI, Python, C, Cplex

Soft Skills: Strategic Planning, Effective Communication, Collaborative Teamwork, Adaptive Mindset, Time Management, Social Media Management, Event Organization

PROJECTS

Supply Chain & Logistics Analytics Dashboard | Power BI

Developed an end-to-end Supply Chain & Logistics analytics dashboard in Power BI, leveraging dimensional data modeling and KPI-driven visualization to uncover insights on revenue, profitability, inventory performance, supplier efficiency, and logistics bottlenecks for data-driven decision-making.

Ride-Sharing Operations Analytics Dashboard | Power BI

Built a comprehensive ride-sharing analytics dashboard in Power BI, transforming large-scale operational and customer data into actionable insights on booking performance, revenue trends, service quality, demand patterns, and geographic hotspots to support strategic business decisions.

Purchase & Shipping Analysis Dashboard | Microsoft Excel

Developed an interactive Purchase & Shipping Analytics Dashboard that analyzed over \$578K in purchases and 10K+ transactions, identifying top-performing product categories, seasonal demand patterns, customer preferences, and operational trends to support data-driven business decisions.

ACHIEVEMENTS & CERTIFICATIONS

- Excel Basics for Data Analysis (IBM)
- Aspire Leadership Program by Harvard
- Advanced Business Analytics (The Johns Hopkins University)
- Supply Chain Logistics (Rutgers University)
- Google Project Management-Sep 2025
